

- Schedule generator

- Clock in and out functions

- **Paystub Generator**

- **Time off Management**

# Employee Management

## Software Functionality

Employer interface includes:

- clock in and out functions
- create week schedules
- approve or deny time off request
- remove or add users to the system
- access to all users paystubs

- **Time off request management**

The software facilitates the employee to submit time-off requests into the system and helps the employer approve and deny time-off request.

## User Friendly Interface

The software will provide a user-friendly interface. The software will have two interfaces, one for the employer and another one for employees.

Employee interface includes:

- clock in and out functions
- Week Schedule
- Time off requests
- Week Paystub

- **Paystub**

The software can generate paystubs of all the employees when it needs it without any inconvenience for the owner of the company.

- **Clock in and out**

The software includes clock in and out functionalities for the employees, making work hours easy for the owner.

- **Schedule Management**

The software helps the employer generate the schedule for the employees and make it accessible for each of them.
